(54) Golf training device

(57) A golf training device comprises an inclined rope 3 suspended between attachment points and a ring 2 to which is fastened a ball 5 by means of a second rope 4. A target may be provided at the furthest attachment point to indicate the impact position.

At least one of these pages has been prepared from an original which was unsuitable for direct photoreproduction.

GB 2 293 551 A

1/2

FIG 1

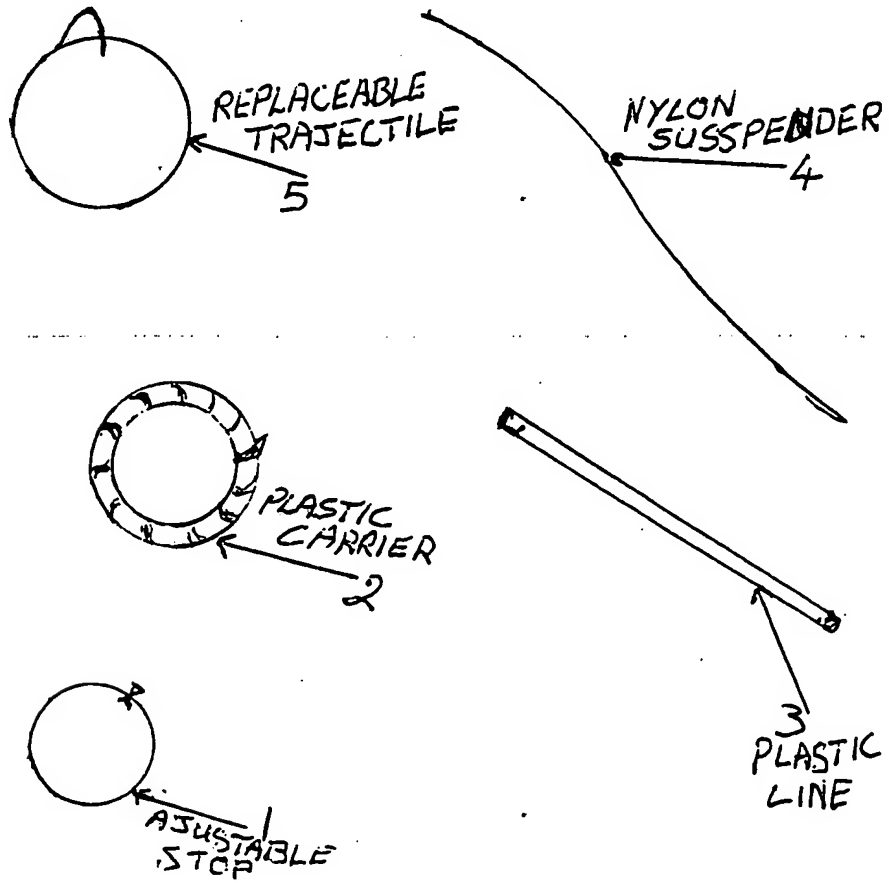

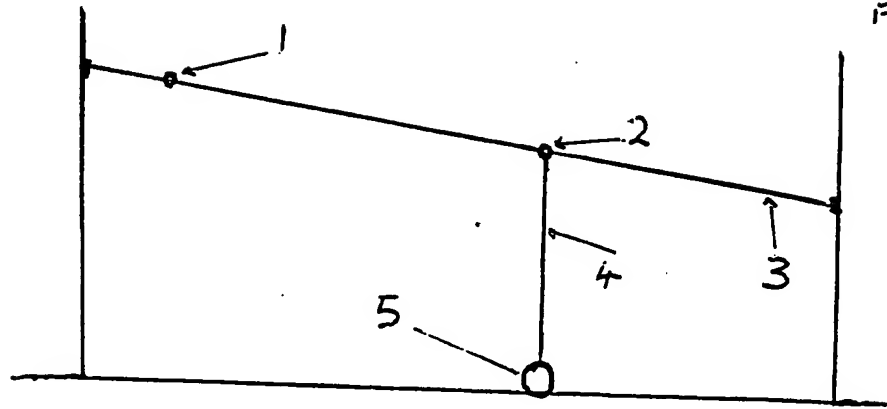

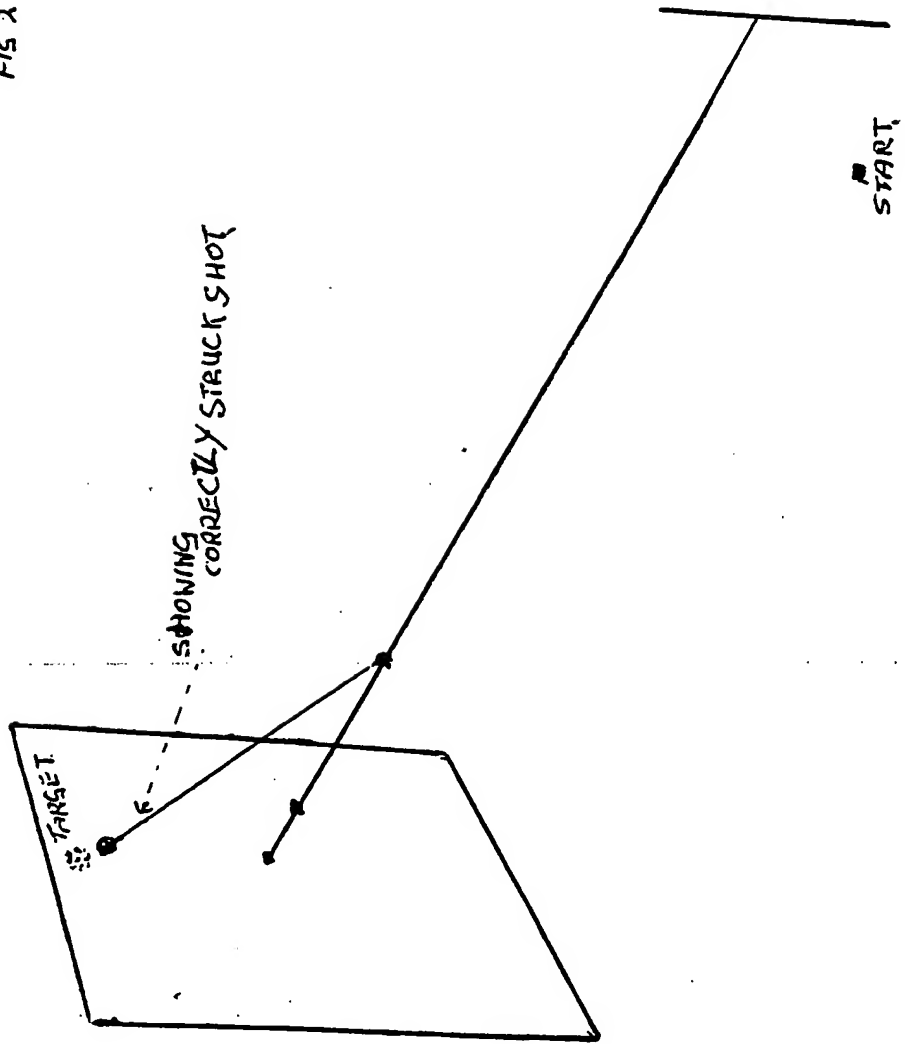

FIG 2

**2293551**

The home golfer is a simple but effective invention related to learning, teaching, or practicing the game of golf in one's own garden or back yard.

With this invention, every aspect of the game except putting can be practised, including the use of every club from the driver to the sand wedge to its full potential.

Fig 1 of the drawing shows the structure and the make up of the home golfer figure 2 shows the picture of the trajectory struck correctly.

**Claims**

1. The home golfer can be used in most gardens or back yards with complete safty.
2. With the home golfer ones own game can be improved as all shots good or bad are clearly seen.

When struck correctly the trajectory travels toward the target. Hooks and slices show accordingly.

**Amendments to the claims have been filed as follows**

1 The Home Golfer is a device using a plastic line, a plastic carrier, a special replaceable projectile and an adjustable stop which facilitates practice of the game of golf safely at home.

2 The Home Golfer is constructed in such a way that when the projectile is struck properly the projectile travels in free unguided flight by means of the carrier and the nylon suspender to its destination.

3 By using the Home Golfer's adjustable stop a chip or pitch shot can be further controlled.
